SKILLS

- Core Skills: Problem solving, **Data structures & Algorithms**, **Low level design (LLD)**, **System design (HLD)**, Data engineering.
- Languages : **Python, Java, SQL**
- Backend: **FastAPI, RESTful APIs**.
- Data Engineering: **Apache Spark, Hadoop**, Airflow, ELK stack.
- Data platforms: **Relational, NoSQL, Cloud, GCP** / Google Cloud Platform, Apache Druid, Iceberg, Kafka, Clickhouse
- Tools and Tech: **Git, CI/CD, Agile/Scrum**

WORK EXPERIENCE

Media.net (Directi)

Bengaluru

Application Developer 2 - Data

[April, 2024 - Present]

- Developed and owned a **cross platform replication and upsert framework using Scala, Apache Spark & MySQL**. Servicing millions of records per hour across 100+ endpoints. Supported RDBMS, Data warehouses and custom I/O (Ex. MsSQL, Kafka, Iceberg, Email etc.)
- Wrote a **utility using Python, Elastic Search, Druid API & Apache Airflow to automatically** cleanup unused dimensions. Thus **reducing storage overhead by up to 20%** and improving query performance.
- Handled **multiple production incidents** and provided solutions in a timely manner.
- Worked on production-grade features involving Airflow, Kafka, **Clickhouse, HQL, Java** – improving capabilities across platforms.

Application Developer 1 - Data

[June, 2022 - April, 2024]

- Developed and Automated a **feature** using Python, Elastic Search & DruidSQL for **identifying and optimizing Apache druid tables**. Achieved **improvements of up to 90%** in row counts, scan time, and CPU usage, significantly enhancing query UX. Using the same, designed database schema for various datasources, **supporting millions records** with optimized indexing.
- Built a tool using **Python, Airflow & MySQL** to manage Apache Druid ingestions, reducing onboarding time by 3x.
- Worked on multiple production-grade features for data loading, visualizations, DB mappings, syncing lookups, and data analytics.

Comcast India

Chennai

Software Development Engineer 1

[Aug, 2021 - June, 2022]

- Developed and maintained a token rotation webapp for internal Databricks users using **Python FastAPI, Javascript & MySQL**.
- Wrote and **maintained a repository** for dependency check & alerting using Bash Scripting.
- Migrated 15+ data pipelines from the UC4 scheduler to an internal tool, demonstrating **efficiency in migrating legacy tech to newer platforms**.
- Acquired experience in technologies including Scala, Python, SQL, **Git, Shell scripting**, and others

EDUCATION

C. Abdul Hakeem College of Engg.

B.E. in Computer Science and Engineering | **CGPA: 8.01**

Vellore

[2017 - 2021]

SELECTED PROJECTS

End-to-end Dataprocessing framework [2025]

- Tech: **Kafka, FastAPI, Microservices, Apache Spark, Clickhouse**
- Built a reusable, templated, scalable data processing framework for an e-commerce website, utilizing the aforementioned tech stack to collect, process, and warehouse realtime customer events.

AVD Encryption ([link](#)) [2021]

- Tech: **Python Django, Networking, HTML, CSS, JavaScript**
- A symmetric encryption technique that uses multiple low computational, non-commutative encryption methods. Uses a 3-server architecture for storage and retrieval of keys and data. Designed to adapt to machines with low processing power.

CERTIFICATIONS AND COURSES

- Java [[Hackerrank](#)]
- DSA and Problem-Solving [[Udemy](#)]
- High-Level Design / System Design [[Udemy](#)]
- Software Engineering [[Hackerrank](#)]
